Pipeline Coating 2016

16-18 February 2016, Austria Trend Hotel Savoyen,
Vienna, Austria

AMI is pleased to invite you to attend the eighth international conference on pipeline protection, Pipeline Coating 2016, which will take place from 16-18 February 2016 at the Austria Trend Hotel Savoyen in the city of Vienna in Austria. The event starts on 16th February with an evening Welcome Cocktail Reception and exhibition followed by a 2-day conference programme.

The 2016 conference will start with a market review; the programme will then include end-use perspectives on how to maximise coating's functionality and performance; finally, coaters and raw material manufacturers will present novel developments in materials, systems and quality assurance. Among the case studies that will be analysed at the conference is Middle East's first carbon capture and storage pipeline.

In some regions of the world, aging pipelines are increasingly in need of rehabilitation and replacement. New pipelines are frequently being installed in locations with harsh environmental conditions: extreme temperatures, underwater depths, rocky or unstable soil, etc. In addition, high operating temperatures and pressures are becoming increasingly common, while transported fluids are often more corrosive and/or abrasive. As a result, performance and reliability requirements are becoming more and more demanding, boosting the role of innovation and technology. The current challenging business environment places additional stress on suppliers and makes differentiation even more necessary in order to achieve commercial success.

With a truly international participation covering the entire supply chain, Pipeline Coating 2016 offers unmatched opportunities to network, exchange experience and learn through interaction with colleagues, suppliers, customers and competitors. Sponsorship packages and table-top displays offer superb opportunity to promote companies, products and services to a knowledgeable, highly relevant audience.

The conference sessions will be held in English and simultaneously translated into Russian.

HEADLINE SPONSOR

Shawcor is represented at Pipeline Coating Conference by its former divisions Bredero Shaw and Socotherm - two of the leaders in pipeline coating - now integrated under the same team among Dhatec, which recently joined Shawcor's family and Canusa-CPS.

This organization combines their full suite of pipe coating solutions for corrosion protection, flow assurance, insulation, field joints and weight coating applications for onshore and offshore pipelines with Canusa-CPS' complementary field-applied coatings and Dhatec's pipe-protection, transport and storage products. With these businesses' resources, world-class facilities, experienced technical teams and innovative technologies Shawcor is primed to offer end-to-end solutions to protect any pipeline, anywhere in the world.
