

WARRANTIES AND RESTRICTIONS

WARRANTIES AND RESTRICTIONS

The purpose of this informative note is to give the user some basic informations about our products .

Powder costings may be used for a very wide range of applications , therefore it is impossible to summarize here all thge possibilities and the restrictions . arsonsisi s.p.a. grants that the characteristics of its products correspond to those mentioned on the technical data sheets of each single product .
Data mentioned on certificates of conformity or on the technical data sheets of each single code always have priority on any general indication .

It is assumed that anyone using these products has a sufficient technical knowledge of them and of possible applicative differences related to the coating system used .

Informations here mentioned cannot and must not to be considered as exhaustive .

Anyone , for any reason , is using arsonsisi products in a way different from what mentioned in this document without having a written authorization from arsonsisi s.p.a. becomes fully responsible for its own actions .

Furthermore , even if what is reported on this document about products is granted as correct , arsonsisi s.p.a. does not have the possibility to control all the costing process (storage of the powder , condition and pre-treatment of the substrate , application process , curing conditions) and therefore is not obliged to respond in case of contestations , claims and/or request of refunding .

This informative note may be modified during time with no prior information to customers .

If this edition is more tahn one year old , please contact customer service of arsonsisi s.p.a. and ask for an updated edition .

This issue replaces and automatically annulates any of previous editions . This is valid for any following editions , too .

BASICAL INFORMATIONS FOR A SAFE USE

Powders may cause irritations to respiratory ways .

Avoid to inhale gas and vapours coming from the polymerization of powder coatings . Avoid contact with skin and eyes ; use proper protection devices .

In case of accidental contact , wash the skin with water and soap or rinse eyes with plenty of water .

Powder coatings can be considered as combustible but not flammable .

Ignition temperature of the mixture powder / air is 450-600°C .

For detailed safety informations please require the specific safety data sheet for the product in use , updated according laws in force .

RECOMMENDATIONS

These informations are given on the base of our best experience as well as the one of specialized laboratories and they are continuously updated , nevertheless the user has the complete responsibility to apply and to experiment the products according its own specific necessities .

This document has the intention to describe and summarize the main properties of arsonsisi products , but in no case it can be considered as a warranty for them .

Further informations about application of metallic effects , maintenance of goods coated with homologated polyesters or availability of special versions are mentioned in specific technical integrative notes .
